

VOICE 1

Tang Bin | China
Lecturer / Beihang University

I am a lecturer at Beihang University and teach the Japanese language. What I learned at Hiroshima University helped me become a good teacher. I try to introduce a better way to teach Japanese as a second language to Chinese learners. HU is the most suitable place to study. Why don't you come to HU and start your journey of discovery from here?

VOICE 2

Sommay Shingphachanh | Laos
Lecturer of mathematics
/ Khangkhay Teacher Training College

At Hiroshima University, I studied about mathematics education as a big theme. My professors and my lab mates shared me some important research findings of their interested research area. Those area of studies become background of my knowledge to push me forward when I return home country. To those who are considering to study in Japan, I personally really recommend you to study at Hiroshima University.

VOICE 3

Titik Ulfatun | Indonesia
Lecturer / Universitas
Muhammadiyah Surakarta

Hiroshima University, as one of Japan's leading universities in education, gave me that wonderful opportunity by providing the course available in English. As a Muslim, I am thankful that Hiroshima University has prayer rooms and also serves halal food in the cafeterias.

International Education Development Program

HIROSHIMA UNIVERSITY

International Education Development Program

The basic philosophy of the International Education Development Program is to develop human resources who can achieve collaborative program solving from a global perspective through education and research on a variety of themes related to educational development in developing countries and regions, including Asia and Africa.

Five Features of Our Program

- Feature 1** Supporting students' learning and research on a wide range of topics related to international educational development
- Feature 2** Most lessons are held in English; international students can submit the thesis or dissertation in English.
- Feature 3** A study and research environment for learning together with international students with different backgrounds from countries and regions around the world
- Feature 4** Practical education and research programs through internships and fieldwork in Japan and overseas
- Feature 5** Instruction by faculty members with extensive experience in international cooperation and seminars by guest professionals and researchers

Degrees

The International Education Development Program will award one of the following degrees according to the research theme and the specialized area.

- ◆ Master of Education
- ◆ Master of International Cooperation Studies
- ◆ Master of Philosophy
